February 12th, 2015

Mr. Edward Comiskey Mayor of Ingersoll Town of Ingersoll 130 Oxford Street, 2nd Floor Ingersoll, ON N5C 2V5

Dear Mayor Comiskey,

We were very pleased to welcome you, Mr. Freeman and Mr. Tigert, in our premises of Louvain-la-Neuve.

It was a great opportunity to freely and respectfully discuss our understanding and your concerns about the Walker project in Beachville.

We would like to summarize our position in this letter.

Carmeuse North America was approached by Walker in the context of Walker's search for a good location for a landfill in Southern Ontario. As such a land use is very different from our core business, the topic was extensively discussed. Ultimately, the Carmeuse Group established four conditions for the North American management to move forward with this project:

- 1) there is a local/regional proven need for the landfill;
- 2) we have to partner with a top class operator having proven high capabilities in managing similar projects in similar conditions;
- 3) there should be no impact on our activities;
- 4) the project must respect all applicable environmental regulations.

Before we entered into a contract with Walker, these four conditions were addressed and supported by a visit to Walker's other landfill site. Inasmuch as all conditions were met, Carmeuse entered into a contract with Walker in 2012.

As explained, Carmeuse is not driving the process. Rather, it is up to Walker and the Provincial Authorities to manage the authorization process and to ensure that Walker addresses all environmental concerns.

Having said that, we also heard and understand your concerns related to air and water potential impacts and we will forward these concerns to Walker and follow up on their response.

Carmeuse will address the long- term management of the landfill with Walker. Specifically, Carmeuse shall seek assurances that Walker cannot sell the landfill to another operator without ensuring that any successor would satisfy the conditions mentioned above.

Lastly, we confirm our willingness to pursue our contacts and will ask our North American Team to make sure that regular contacts are organized with you and your Team in order to keep a good level of mutual understanding.

In the meantime, we remain, sincerely yours,

Rodolphe Collinet

CEO Group

Dear Mayor Comiskey and Ingersoll Council,

Our environmental research organization is endorsing your recent activities with regards to the opposition of the Walker Industries/Carmeuse Lime 'Southwestern Landfill Proposal'.

We very much appreciate Ingersoll's law team sending a letter to the Ministry of the Environment and Climate Change, the letter makes it clear that Ingersoll will use all legal means to oppose the siting of a private landfill on Ingersoll's border.

We also thoroughly endorse the trip planned for the Mayor, Deputy Mayor, and CAO from the Town of Ingersoll to Belgium, to appeal to Carmeuse Lime to cancel their agreement with Walker Industries.

With best wishes for a safe journey, and a favourable conclusion – the stopping of the Southwestern mega-landfill.

Sincerely,

Suzanne Crellin Bryan Smith Reed Elliott Mike Farlow

The report was presented to the members for their information. The members inquired whether there are safety procedures in place for students attending Authority programs in or near water courses.

I. Wilcox stated although he is confident appropriate safety measures are in place, he will pursue this matter with staff.

(b) Fanshawe Pioneer Village

S.Johnson advised the members tickets are sold out for the 'Dickens' Dinner' and there are only a few tickets still available for 'Visit with St. Nicholas'. Approximately 2,000 students will attend the Village's school program running from November 27th till December 17th.

She advised the members that although the Village will meet its year-end attendance targets it will face a year-end financial deficit. She will know the amount once she has reviewed the November 30th Financial Statements.

She referred to the next Strategic Plan for the Village. She noted over the past year the Board of Directors have developed a new vision, mission and values for the Organization, and for the past three months developed the Strategic direction. All documents were approved at the November Board meeting. She outlined the next step in the process involving community consultation.

The members entered into a brief discussion regarding the 2014 financial deficit. S.Johnson advised the members there are several scenarios she will review to better understand why this occurred and rectify the situation for the future.

I. Wilcox reminded the members of the impact the Village's financial position has on the Authority.

The GM GREEN program included a field trip for the students to local drinking water and wastewater treatment facilities, including the CAMI Assembly Wastewater Treatment Plant in Ingersoll.

GM GREEN Education Program This year, GM celebrates a milestone anniversary of its signature

This year, GM celebrates a milestone anniversary of its signature watershed education program, GM Global Rivers Environmental Education Network (GREEN). For the 25th year, company employees are wading into waterways across the U.S. and Canada with about 9,000 students.

The GREEN program began in 1984 when a group of concerned high school students wanted to investigate water quality from the Huron River in Ann Arbor, Michigan, believed to be linked to an illness in the community. Their teacher contacted Dr. William Stapp, a University of Michigan professor. Dr. Stapp helped plan the first Earth Day in 1970 and many consider him to be the founder of environmental education. Together, they developed GREEN. GM became a financial and volunteer contributor in 1989.

Through the years, GM has matched 142,000 students with more than 3,000 employees to collect, test and analyze water samples. The findings are used to develop sustainable action plans addressing water quality issues in their communities. GREEN sharpens problem-solving skills, improves knowledge of science and the environment, and encourages community involvement.

This year, GM Canada is bringing the GREEN program north of the border. Partnering with the UTRCA and the Thames Valley District School Board, approximately 100 students from Algonquin Public School (Woodstock) and Harrisfield Public School (Ingersoll) are participating in the pilot program.

The program began with a tour of the Woodstock Wastewater Treatment Plant, a municipal well water treatment facility, and the CAMI Assembly Wastewater Treatment Plant. During the tour, students learned how water is treated before it comes out of their taps as well as after it leaves their homes so that it is safe to reenter the local waterways. This field trip started the students' investigation into the environmental conditions in their community.

A second field trip in October had students conducting a hands-on investigation of a local creek. Students monitored water chemistry, calculated stream velocity, identified and catalogued aquatic organisms, and classified habitat quality. This field trip is followed up in November with an in-class session to further interpret the water quality and habitat results, and begin looking at project ideas to improve local environmental conditions. Over the winter months, students will focus on a local environmental issue that they can positively influence, and will develop a project to implement in the spring with the help of all project partners. Contact: Brad Hertner, Community Partnership Specialist

The students' second field trip took them to a local waterway to assess parameters such as stream velocity, water quality and habitat.

Landowners' Conservation Behaviours and Attitudes

Resources management professionals in southwestern Ontario have expressed concern about the fate of conservation lands on the landscape as agricultural land prices have increased to unprecedented levels and commodity prices have fluctuated in recent years. Jeff Brick, UTRCA Coordinator of Hydrology and Regulatory Services, recently researched conservation behaviours and attitudes in the Upper Thames and Grand River watersheds, as part of his Master of Public Administration at Western University.

Using data from a survey administered in the spring of 2013, Jeff's study assessed 3,227 survey respondents, as well as a more detailed statistical analysis on a subset of 627 respondents considered to be farmers. For this study, farmers were defined as those respondents who reported owning 100 acres of land or more, with at least 50% of their income coming from farm receipts.

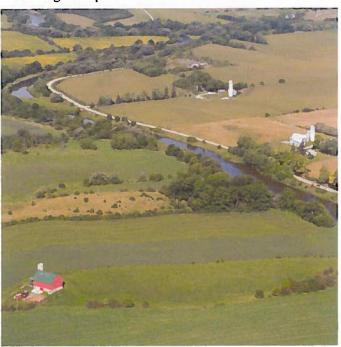

Analysis of the information provided by the 627 farm respondents found that farmers with larger land holdings exhibit more conservation oriented behaviour. Interestingly, there was no statistical relationship found between farm size and farm respondent's attitudes about conservation. The study found that farmers that have owned their land for a longer period of time exhibit more conservation oriented behaviour and a stronger conservation ethic. It was also determined that farmers with higher debt loads tend to have lower conservation ethic scores, and older farmers exhibit more conservation oriented behaviour than younger farmers.

The study provides a significant amount of data about rural landowners across the study area. One interesting and, perhaps, troubling finding relates to the formal education level of younger farmers. The 3,227 respondents report relatively high levels of formal education and the same is found for the 627 farmer

respondents. However, when the responses for farmers are further analysed, it is found that less than 50% of farmers under the age of 40 have completed a high school education. This finding varies significantly from the education level that is found in the aggregated data and in the general social sciences literature.

The study provides insights into the farm and rural landowner residents in the Upper Thames and Grand River watersheds. These insights can be used to refine existing extension programming or guide new programs in the study area and perhaps even beyond.

Some caution does need to be exercised when interpreting the findings. For example, while the survey may be capturing a recent shift in agriculture economics, it does represent a snap shot in time and commodity prices have retreated somewhat since the spring of 2013. The 18% response rate was very good for the non-targeted survey method that was used, but the results may still be influenced by non-response bias. Also, the concept of conservation in this study was focused on physical conservation lands such as wetlands, trees and fallow lands. Soil conservation best management practices were not considered.

The study focused on farmers' conservation behaviours and attitudes.

The study has allowed for the creation of a rich data base of information that is relatively current. The data should be further analysed to isolate categories of landowners and the varying attitudes and behaviours that these categories exhibit. The study would also benefit greatly from secondary analysis such as a follow up study to explore non-response bias.

Funding for the study was provided by the Social Sciences Research Council. Research partners included Professor Van Lance, University of New Brunswick; Professor Wolfgang Haider, University of Toronto; Ryan Trenholm, Simon Fraser University; and Professor Robert Young, Western University. The UTRCA and GRCA assisted with survey implementation.

The Thames River Clear Water Revival (TRCWR) was established in 2011, after efforts by the City of London to gather support for an updated water management plan for the river. The Steering Committee includes representatives from the following First Nations, agencies and municipalities:

- Aamjiwnaang First Nation
- Caldwell First Nation
- · Chippewas of the Thames First Nation
- Delaware Nation Moravian of the Thames
- · Oneida Nation of the Thames
- Walpole Island First Nation (Bkejwanong Territory)
- · Environment Canada
- · Ontario Ministry of Agriculture, Food and Rural Affairs
- Ontario Ministry of Environment and Climate Change
- Ontario Ministry of Natural Resources and Forestry
- · Lower Thames Valley Conservation Authority
- Upper Thames River Conservation Authority
- · City of London

Chippewas of Kettle and Stony Point First Nation and Munsee-Delaware Nation have also been invited to participate.

The Committee's first project is to develop a Water Management Plan (WMP) for the Thames River, focusing on issues related to water quantity and quality. The Ministry of the Environment and Climate Change's Showcasing Water Innovation (SWI) program has provided funding for several WMP projects, including:

- · Thames River water quality assessment
- Developing and demonstrating innovative BMPs to account for changes in climate
- Merging rain gauge and weather radar data to estimate precipitation
- Upper Thames River stream flow statistics
- Digital elevation mapping
- Hydraulic modeling using GIS, digital elevation mapping and survey data

The SWI projects are wrapping up this fall. A technical symposium in early December will present these projects, as well as information on First Nations Traditional Ecological Knowledge, rural landowner behaviours and attitudes, and low impact development (LID).

High School Students Learn about LID

On October 31, the Thames Valley District School Board held its annual Secondary Student Environmental Symposium. Approximately 200 keen high school students attended, each participating in three of the 24 workshop sessions. The venue for the symposium was the Thames Valley Education Centre in London.

UTRCA Community Education staff held two sessions of a workshop featuring Low Impact Development (LID) for managing urban stormwater. The workshop was designed to build knowledge of LID and apply that information to the actual Education Centre site.

Students learned about the ability of LID to reduce aquatic pollution, flooding and erosion, as well as improve groundwater recharge. They looked at a variety of functional landscape features and urban design elements that could be utilized in a LID stormwater plan.

Secondary students at the TVDSB Environmental Symposium.

After covering LID 101, students were given a map and put to the task of calculating the impervious surfaces at the Education Centre. The impervious surfaces added up to almost 2 ha which is equivalent in size to the average woodlot in the area! Using the annual rainfall, they calculated the volume of water these surfaces contribute directly to the Thames River each year, and were surprised to learn it is equivalent to approximately 37,000 bathtubs full of untreated water. Then it was time to develop an LID plan that would manage the rainfall more like nature does, by allowing it to soak into the ground rather than running off into storm sewers. The students drew their plans directly onto the maps provided and indicated they would follow up by reporting to their teachers and environmental clubs.

The workshop reviews were very positive and we look forward to reaching out to more students through presentations and providing opportunities for design and implementation.

Source Protection Plan

The Source Protection Committee (SPC) is preparing to consult on an Amended Proposed Source Protection Plan (SPP) and Updated Assessment Reports (AR). The Proposed SPP was submitted to the Ministry of the Environment and Climate Change (MOECC) for approval in December 2012. All three ARs for the region had previously been approved by MOECC.

Since submitting those documents, the SPC and staff have been working on updates to both the SPP and ARs. For the Upper Thames River Source Protection Area, the updates include a nitrate Issues Contributing Area (ICA) for Woodstock wells and the completion of the Tier 3 Water Budget and Water Quantity Risk Assessment. The ICA will allow the County of Oxford to manage the activities that contribute nitrate to the drinking water source so that these productive well fields continue to provide safe drinking water for the City of Woodstock. The Water Budget concluded that there is no significant or moderate risk to drink water quantity in the Upper Thames. The Assessment Report has been updated to reflect this additional technical work. Revisions to the SPP have also been made to reflect this work. Minor changes to policies have been completed to improve clarity and consistency in the policy wording in the SPP. In June 2014 we received comments on the proposed SPP from the MOE, which have also been incorporated into the Amended Proposed SPP.

In December and January, the SPC will be consulting on the Amended Proposed SPP and Updated ARs for the Upper Thames, Lower Thames and St Clair Region Source Protection Areas. The documents will be posted on the Source Protection Web Site (www.sourcewaterprotection.on.ca) as well as being available at the Conservation Authority offices. Notices will be placed in newspapers, posted on the web site and sent to municipalities, First Nations, policy implementers and those who may be engaged in significant drinking water threats affected by policies in the SPP. Open houses will be held at each of the CA offices. Details on the open houses will be included in the notices. Following consultation and consideration of any comments received, the SPP and AR will be submitted to the MOECC for approval.

In anticipation of the approval of the first SPP for the Thames-Sydenham and Region, municipalities are busy preparing for implementation. Depending on the approval of the SPP, it is possible that the SPP would be in effect in late 2015 or early 2016. Funding provided by the Province has assisted the municipalities with their preparations for implementation.

Schedule

Recommendation:

That the Board of Directors approves the proposed fee changes for the 2015 operating season and that the fees are applicable to all user groups that visit our Conservation Areas.

Background:

In late October, the Conservation Areas Unit met to review the Admission Fee Schedule for the 2015 operating season. Following the same structure as in the past, the session was facilitated by Steve Sauder. Any changes proposed were based on the following criteria:

- 1. Market analysis of similar local and regional recreational opportunities, both public and private.
- 2. The cost associated with operating our Conservation Areas, meeting regulated mandates and maintaining a high level of customer service.
- 3. Review of marketing, customer service, advertising and promotional plan to determine the cost of implementing new initiatives and the potential revenue generated.
- 4. Review of customer comment cards and day to day feedback from patrons and seasonal staff.

After considering the above criteria, staff is proposing a series of minimal fee increases. A majority of our fees continue to be on the high side when compared to similar facilities; however, operational costs continue to rise and, therefore, an increase is necessary. Nightly camping fees continue to be in line with other organizations offering similar facilities and therefore these rates were not impacted.

Similar to past years, capital investment in our Conservation Areas was limited in 2014. Staff continue to watch expenses while making minor improvements to our various facilities. Cosmetic improvements to washrooms, signs, and maintenance on our drinking water systems were the focus for 2014.

Please refer to the table below for the proposed fee changes for 2015.

Justin Skrypnyk (Assistant Superintendent, Pittock Conservation Area)

Recommendation:

That the Board of Directors designate Justin Skrypnyk as a Provincial Offences Act Officer for the purpose of enforcing the Trespass to Property Act and the Conservation Authority Regulations on UTRCA property, as a requirement of the position of Assistant Superintendent at Pittock Conservation Area.

Background:

The Board of Directors appoints as Provincial Offences Act Officers those full time staff whose responsibilities include performing regulatory enforcement duties associated with Section 29 of the Conservation Authorities Act and other relevant regulations. Prior to the appointment, the individual being considered must have proof of a clear criminal record (immediately prior to the appointment) as well as proof of training in the POA process. Typically, staff provides proof of completing the MNR Park Warden Training or equivalent.

Justin Skrypnyk, Assistant Superintendent – Pittock Conservation Area successfully completed the Conservation Authority Compliance Training on October 16, 2014 at YMCA Geneva Park in Orillia. Justin is a graduate of Western University with a double major in criminology and sociology. He joined the Conservation Area Unit in April 2011 as a seasonal security officer and became the Park Operation Technician in December 2011 – both positions being held at Fanshawe CA. In the spring of 2014, Justin became the Assistant Superintendent at Pittock CA. As part of the designation requirement, Justin has provided us with proof of a clear criminal record.

As indicated, designation under the Provincial Offences Act is subject to approval of the UTRCA Board of Directors.

RCA_PO.FloodControl:399.1

Recommendations:

1. That a budget increase to \$35,000 from \$25,000 for the West London Dyke Master Repair Plan MEA Class EA Approach 2 be approved.

2. That the Stantec Consulting Ltd. estimate of \$31,400 + HST dated November 10, 2014, increased from \$18,600 + HST approved in 2013 to update First Nations consultation and develop additional information towards completion of the West London Dyke Master Repair Plan Class EA, be approved.

Background:

At the April 2013 Board meeting a recommendation was reviewed and approved to adopt the West London Dyke Master Repair Plan as a guideline document for future planning. The planning process for the Plan had followed the Municipal Class EA Schedule B, Approach 1 process.

In September 2013 the Board received and approved a recommendation to change the EA approach to Approach 2 under the Municipal Class EA. The recommendation was brought forward after staff discussions with the City of London led to the opportunity to revise the direction of the Plan. The change would permit project phases in the future to be undertaken without needing to pursue individual Class EAs for each phase. At that time it was also decided to include and complete the Plan with updated flood level information being developed through climate change studies and new floodlines under review by UTRCA.

To date, the Approach 2 of the Master Repair Plan has not been completed with a final public consultation for the primary reason that review of City studies related to the Authority's interest in updating flood lines were not satisfactorily concluded and the Authority's own hydrologic studies were delayed. Additional considerations related to First Nations consultation also need to be updated. While contact was made and correspondence exchanged in 2011 with First Nations, protocol and procedures have since changed as directed by the Province. With this in mind, the City and Authority have agreed to update consultation with First Nations on the project and then complete the Master Plan Class EA. The additional efforts to consult with First Nations have been estimated by Stantec Consultants undertaking the project for the Authority.

It is now expected that the final public consultation under Approach 2 may be able to be completed in between March and June 2015. Stantec has submitted a revised proposal and estimate of \$31,400 + HST to carry out the additional First Nations consultation update. Additional cost is also included to provide additional conceptual cross sections requested by the City and allow for revised consultant per diem due to the project delays. The additional cost over that proposed in 2013 (\$18,600) is primarily based on the possible First Nations consultations required through Stantec's experience with infrastructure projects. The costs may vary depending on the number of meetings required. The revised estimate is appropriate for the revised project scope.

Budget:

An increase to the WECI approved budget in 2014 as carry over from 2013 for the change to Approach 2 has been granted by the Ministry of Natural Resources and Forestry from \$25,000 to \$35,000.

As the completion of the project based on the Stantec estimate will now carry on beyond the MNR fiscal year ending April 1, 2015, it will be necessary to request additional funding in 2015. Additional funds can be requested at that time. The City of London is aware that the project may extend into the MNR fiscal year 2015-16 and would be at some risk of funding however dyke studies to date have successfully received funding.

If there are any questions please contact either of the undersigned.

West London Dyke 2014 Interim Repairs

Purpose

Purchasing policy requires staff to inform the Board of tenders if the lowest tender is accepted.

Background

Projects for Interim Repairs to the West London Dyke were identified in the 20 Capital Repair Plan. The 2014 Interim Repair was on the 2014 Board of Directors approved list (Feb 2014) of Water and Erosion Control Infrastructure (WECI) projects. These interim repairs are necessary to maintain the function of the dyke while planning continues for reconstruction.

Tenders were requested in August 2014 from six contractors that were pre-qualified in 2012 for three years. The tenders were evaluated by Stantec Consultants under a previously approved three year contract for annual inspections and engineering services. Three bids were submitted as follows:

Contractor: Base Bid: Provisional Items Bid:

 Ro-Buck Contracting Ltd.
 \$75,600+HST
 \$42,700+HST

 Jarlian Construction Inc.
 \$126,600+HST
 \$106,600 + HST

 Clearwater Structures Inc.
 \$132,390+HST
 \$89,050+ HST

A Contingency Allowance of \$15,000 as required was also allowed for in each Base Bid. The tender was awarded to Ro-Buck Contracting Ltd. for \$75,600 + HST. The tender also included Provisional work items (railings and curbing) primarily based on previous experience. The WECI budget for 2014 was increased to \$200,000 over past years to account for potentially harsher winter and spring conditions earlier in 2014. The lowest bid, including Contingency Allowance and Provisional Items, would be able to be accommodated in the budget.

The repair project was completed in October. The Contingency Allowance was exceeded and a small amount of provisional costs were only incurred related to railing repairs. The contractor cost was \$80,502 + HST. Total costs once final consultant invoices and some UTRCA costs are accounted for are expected to total approximately \$120,000+HST, similar to the 2013 repair program.

RT Orr Dam Stop Logs Fabrication

Report Purpose:

This report follows up on the August 25, 2014 information provided to the Board noting Tenders received and the award to the lowest bidder at that time. The lowest tender, JR Robertson Industrial Metal Service Ltd., was awarded the work but could not meet the specified Canadian Welding Board (CWB) W 47.2 certification requirements for aluminum structural welding as specified. Due also to inconsistencies in other bids, a second tender was subsequently released in September and new bids were received.

Report on the RFQ Process:

Five CWB certified fabricators were invited to submit tenders for the 2nd Request for Quotation. Bids were received from:

Earl S. Ross Inc.

\$56,810.75

Dielco Industrial Contractors Ltd.

\$59,414.16

Abuma Manufacturing Ltd.

\$141,332.55

Lor-Don Ltd.

\$150,885.00

The above bids included HST.

Earl S. Ross Inc. was initially awarded the contract however they could not provide the securities for payments and performance of the work and maintain the fabrication schedule specified. Dielco Industrial Contractors Ltd. was subsequently awarded the contract as next lowest tender at a cost of \$59,414.16 including HST. This amount is lower than the lowest tender reported in the August 25, 2014 report. Dielco provided the required securities.

Feasibility Study of Management Alternatives

for the London Dykes

Report Purpose

UTRCA purchasing policy requires Board approval if other than the lowest cost proposal is recommended for acceptance by staff. A request for proposals was released in early October and proposals are due November 12. The proposal submission period was lengthened due to significant consultant interest in the study. Six consultants with the potential depth of resources and experience to undertake the study were requested to submit proposals.

The results of the review process are planned to be compiled by staff and presented at the Board meeting on November 25, 2014. If the lowest proposal is recommended, this report will remain as an information report. If staff are recommending a proposal bid cost other than the lowest, this report will be moved to the "for approval" part of the agenda.

Background

This study was included in the 2014 - 20 Year Capital Repair Plan and list of projects approved by the Board (Feb 2014) for the 2014 WECI submission.

The UTRCA, through agreement with the City of London, is responsible for major maintenance of the London Dyke system. Since the early 1980's limited rehabilitation and monitoring efforts have been undertaken. In recent years (since 2003) with capital repair funding restored by the Province, efforts have increased due to the nature of the aging infrastructure of the protective works for the London Dykes.

There are seven developed flood plain areas along the Thames River within the City of London protected by approximately 5.1 km of dykes (incl. West London Dyke -2.83 km.). The dyke locations are shown in Fig 1 (last page). The dykes under this study are:

- Front St. Dyke partially decommissioned (located on Thames River, South Branch)
- Ada-Jacqueline Dyke (South Branch) supports a flood plain planning Special Policy Area
- Nelson-Clarence Dyke (South Branch)
- Broughdale Dyke (North Branch Thames River)
- Riverview-Evergreen Dyke (Main Branch Thames River)
- Coves Dyke (Main Branch), supports a floodplain planning SPA
- Byron Dyke (Main Branch)

This study follows on the results of a Stability Review Study by AECOM Ltd. completed in 2012 which evaluated the stability of the dykes in the City of London. That study included a stability review for the West London Dyke, produced draft technical guidelines for dyke design, and provided

preliminary alternatives and costs for future management alternatives. The West London Dyke is not included in this study.

One main outcome of the AECOM study was an overview of potential alternatives for future management and general feasibility of typical options for the dykes. The following table (excluding Front Street) provides a summary of the evaluations. Preliminary best alternatives suggested are shown in bold type.

Dyke	Opportunity 1 -	Opportunity 2 -	Opportunity 3 -	Opportunity 4 -
	Maintain Dyke in	Redesign/Regrade	Reconstruct Dyke in	Reconstruct Dyke in
	Existing Condition	Dyke Slopes	Existing Location	New Location or
				Abandon Dyke
Ada-Jacqueline	Low-Moderate	Moderate	Moderate	Low
Broughdale	Low-Moderate	High	Low-Moderate	Low
Byron	Low	Moderate-High	Low	High (Abandon)
Clarence-Nelson	Low	Moderate	Moderate	High (New Location)
Coves	Moderate-High	High	Low	Low
Riverview-	Low	High	Moderate	Low
Evergreen				

For future dyke maintenance, consideration of standards, guidelines, and best practices are important in ensuring the flood protection capability of the London Dyke system. Comparably, emphasis on dam safety is increasing nationally and provincially, and public safety standards have been furthered at different levels of government and peer organizations. Standards for dyke safety are less certain and have to date not been as comprehensive as standards advocated for dams. For this study, the application of the draft dyke safety guidelines recently developed by AECOM for UTRCA and the City will be applied.

The study involves the preliminary engineering investigation of alternatives which may include repairing, raising, protection, relocation, abandonment, or removal. These alternatives follow up on the basic alternatives and recommendations of the AECOM stability review. The study will develop more accurate engineering estimates of benefits of flood risk reduction and overall costs of various management alternatives. The study will make recommendations on the best options to implement in the future and direct next phases that may require Class EA activities and subsequently design and implementation of the preferred options for each dyke.

The study will be supported by existing 2009-10 baseline surveys, the 2012 Dyke Stability review, preliminary property evaluations by the City, borehole monitoring data since 2012, new (2014) flood line mapping, and flood risk and damage assessments by the Authority. General information from 2008 – 2011 City of London climate change vulnerability assessments may complement the overall damage assessment methods.

Consultant proposals will be received as a two envelope submission; Part A being the technical proposal and Part B being the cost proposal. All Part A proposals will be reviewed, scored, and ranked. Technical proposals ranked the highest and of comparable quality will be selected for Part B review. Scoring of both Parts will be considered in the selection of a preferred consultant.

Budget:

The initial 2014 WECI project estimate has been reduced to better match the 2014 MNR fiscal year end (April 1, 2015) requirements for expenditure claims. The change is as a result of increasing the study period and delays in supplying the necessary background technical information as is the case for the

West London Dyke Master Repair Plan work (See For Approval report). The WECI budget for 2014 has been reduced to \$200,000 from \$330,000. A 2015 WECI budget submission for the remaining funding will be considered once the project is underway. The City of London is aware that a further WECI application will be required in 2015 and that the study will need to continue in 2015.

Please contact staff if there are any questions.

Feasibility Study of Management Alternatives

for the London Dykes

Report Purpose

Purchasing policy requires staff to inform the Board of tenders if the lowest tender is accepted.

Background

This study was included in the 2014 - 20 Year Capital Repair Plan and list of projects approved by the Board (Feb 2014) for the 2014 WECI submission. Further background information about the project is contained the November 11, 2014 Memo on the same project, report item 11 (f).

Report on the RFP Process:

A request for proposals was released in early October and proposals were received November 12. Six consultants with the potential depth of resources and experience to undertake the study were requested to submit proposals. Three proposals were received responding with work plan proposals (Part A) and cost proposals (Part B) for this project as requested. If Part A proposals are highly ranked or preferred then Part B financial proposals are reviewed. In this case, the Part A proposals of two consultants were suitable with the AECOM proposal generally favoured over Dillon's and therefore Part B was opened for both consultants. A third proposal submitted by Stantec, while generally sound in engineering matters, was considered conditional related to proposing a direction otherwise described in the Terms of Reference and their Part B was not further considered. The Base cost bids were as follows:

AECOM Canada Ltd. – London DILLON Consulting Limited – London \$254,534 + HST \$362,529 + HST

TEDOTY Consulting Diffited London \$302,327 | Tic

Both firms also provided costs that were identified in the Terms of Reference as Contingency (fixed lump sum \$20,000) and Provisionary for potential related investigations (surveys, flood modeling). With Contingency and Provisional costs the full bids were:

AECOM'

\$337,539 + HST

DILLON

\$418,879 + HST

AECOM was the preferred consultant based on the evaluation of Part A and Part B proposals. AECOM and their subconsultant's involvement with the prior stability review study was reflected in their thorough description of tasks and appropriate allocation of costs. AECOM was awarded the project at an upset limit of \$337,539 + HST.

Budget:

As previously reported, a 2015 WECI increased budget submission for the remaining project funding will be considered once the project is underway and expenditures to the end of the MNR fiscal year end of March 2015 can be estimated. The City of London is aware that a further WECI application will be required in 2015 and that the study will need to continue in 2015.

UTRCA costs of \$40,000 have been identified to support specific components of the project where UTRCA supporting studies are important to support consultant's work. Authority work will be carried out to identify and recommend future detailed natural environment studies through Subject Lands Status Reports for the dykes, model the effects of dyke alternatives on flood levels, and assess the change in flood damage and risk to life with various dyke management alternatives. Authority costs are claimable to the funding sources for this project.

Building Replacement Design

- Consultant Award

Purpose

Purchasing policy requires staff to inform the Board of tenders if the lowest tender is accepted. The contract for the Pittock Operations Building Replacement Design was awarded to the lowest cost proposal from BM Ross and Associates for \$39,270+HST.

Background

A project for Pittock Dam Operations Building Replacement Design was identified in the 20 Capital Repair Plan. The 2014 project was on the 2014 Board of Directors approved list (Feb 2014) of Water and Erosion Control Infrastructure (WECI) projects.

The Pittock Dam Operating Building houses water level monitoring equipment and provides entry to the tunnel and equipment at lower levels within the dam. The building is slated for replacement due to a number of factors. The building was erected to house equipment after construction of the dam, provide a covered access to the inside of the dam, and to bring to the dam some operations control from the original control building south of the dam. The building no longer meets the needs of the Authority and needs to be reconstructed to be a stronger building overall, for future equipment needs, to add equipment hoist capabilities and particularly to address Health and Safety considerations such as potential rescue services within the dam.

The project will evaluate various preliminary alternatives for structure replacement against design objectives and costs. Final designs will proceed based on a preferred alternative. General cost estimates to accommodate potential public access over the dam will also be developed.

Report on the Proposal Process

Nine consultants were invited to submit proposals. Part "A" and Part "B" proposals were received from BM Ross and Associates, AECOM Ltd, and MTE Engineering. Proposal review was undertaken by reviewing Part A technical proposals of each consultant and then Part B cost proposal if the technical proposals were satisfactory.

Part A review indicated that AECOM had a slightly stronger technical proposal. As all 3 consultant's proposals fairly comprehensively addressed the Terms of Reference, Part "B" Cost proposals were also reviewed. Review found that the BM Ross cost proposal while being the lowest cost also provided the most cost effective distribution of effort relative to project needs, matched their technical proposal more closely, and provided a good median of effort required for the project.

The Part B cost proposals were received as follows:

Consultant:	Proposal Cost
BM Ross Associates Ltd.(Goderich)	\$39,270 + HST
MTE Engineering Ltd. (Stratford)	\$40,500 + HST
AECOM Consulting Ltd. (London)	\$53,054 + HST

Project Budget:

The project budget submitted for WECI funding was \$40,000. The design project will continue into the 2015 - 16 MNR fiscal year and will therefore be subject to further WECI budget approval with a 2015 application to extend funding. Pittock Dam ranks sufficiently high relative to WECI criteria that obtaining additional funding is very likely.

Part of the design project is to determine the extent of MNR approval required relative to the Lakes and Rivers Improvement Act. This will be determined during the study. The work plan allows for time to obtain approvals if necessary however the cost is unknown at this time beyond initial enquiry. The structure design may also call for additional general repair works to support the design. Additional work such as asphalt or embankment repair may require geotechnical input during final design. A Contingency Allowance has been set at \$8,000 to cover potential additional costs of approvals and geotechnical input to complete the design with which to proceed to tender in 2016. The Contingency may be required during the latter part of the project and will be included in the WECI application for the 2015-16 MNR fiscal year.

Dear Colleagues,

Re: Applying a human rights lens in zoning, licensing and municipal decision-making

As new and returning mayors, councillors and elected officials, you play a central role in ensuring that municipal processes and decisions respect the human rights of all community members. The Ontario Human Rights Commission (OHRC) has worked for several years with governments, experts and community partners to increase human rights compliance in housing, land use and licensing. I'm writing to share some positive developments in these areas, and to point out some OHRC resources that can help you make your community more inclusive.

In 2014, Toronto and Smiths Falls removed minimum separation distance (MSD) and other zoning restrictions for group homes, as part of human rights settlements with the Dream Team, a mental health consumer-survivor group. This follows similar moves by Sarnia in 2011 and Kitchener in 2012. In each case, there was no planning justification for MSDs. In fact, Toronto's own external planning expert recommended they be removed because they contravened the Human Rights Code.

Over the past few years, several other municipalities have recognized their human rights obligations by preventing or removing zoning, licensing and other barriers to housing and services (such as methadone clinics) that are needed by Code-identified groups.

The Ministry of Municipal Affairs and Housing has also reinforced the requirement to meet Human Rights Code obligations in municipal work by adding human rights language to two key resources:

- Section 3 of the Municipal Councillor's Guide 2014 [www.mah.gov.on.ca/AssetFactory.aspx?did=4965] now refers to Code protections
- Section 4.6 of the 2014 Provincial Policy Statement under the Planning Act [www.mah.gov.on.ca/Page10679.aspx] now states that the PPS shall be implemented in a way that is consistent with the Code and the Charter of Rights and Freedoms.

Also in 2014, several Ontario planning schools and organizations added human rights content to courses and ongoing professional education. We continue to work with them to ensure that new graduates and practicing planners incorporate human rights principles in their work.

The OHRC provides several tools to help elected officials, staff and advocates improve human rights in housing, planning, licensing and other municipal decisions.

- Our municipal guides, In the zone: Housing, human rights and municipal planning
 [www.ohrc.on.ca/en/zone-housing-human-rights-and-municipal-planning]; and
 Room for everyone: human rights and rental housing licensing
 [www.ohrc.on.ca/en/room-everyone-human-rights-and-rental-housing-licensing]
 identify human rights risks and best practices in zoning and licensing.
- Our Neighbourhood housing tip sheet [www.ohrc.on.ca/en/neighbourhood-housing-tip-sheet-fact-sheet] offers suggestions for responding to community concerns about affordable supportive and rental housing, including discriminatory opposition that is based on stereotypes, assumptions and misinformation about people or the impact on the neighbourhood.
- Municipalities can also spread the message about human rights in housing by sharing our landlord and tenant brochures, fact sheet on fair rental housing ads, and *Policy on human rights and rental housing* with community members and organizations.

These publications are available in both English and French on our website at www.ohrc.on.ca/en/social_areas/housing. To order printed copies, email us at communications@ohrc.on.ca.

Municipalities are the level of government that is closest to the daily lives of people across Ontario. The decisions you make can have an immediate impact on the human rights of your residents. I challenge you to look at your planning, bylaws and decision-making processes, and to apply a human rights lens to help your neighbourhoods and communities be supportive, welcoming places for everyone to call home.

If you would like more information on human rights, municipal decision-making and housing, please contact Jacquelin Pegg at 416-326-9863 or via email at jacquelin.pegg@ohrc.on.ca.

Dear Mayor Comiskey:

I am pleased to share news with you regarding the 2015 Premier's Award for Agri-Food Innovation Excellence program and to encourage you to share this information in your municipality.

The Premier's Award for Agri-Food Innovation Excellence program was created to recognize and foster the spirit of innovation that thrives in Ontario's agricultural sector. It encourages the development of rural communities, farms, agri-food processors and agri-food organizations by adding value to existing products, creating jobs and driving economic growth.

Each year the program recognizes up to 45 award winning innovations across the province valued at \$5,000 each. In addition, there is a Premier's Award valued at \$75,000, a Minister's Award valued at \$50,000, and three Leaders in Innovation awards valued at \$25,000 each. All award recipients receive a plaque, a gate sign and use of the Premier's Award program wordmark.

Primary producers, processors or agri-food organizations are invited to submit applications between February 6, 2015 and April 10, 2015. Details on eligibility, innovation categories, assessment criteria, the application and selection processes can be found in the enclosed 2015 Program Guidebook and Application Form or at www.ontario.ca/agrifoodinnovation.

I ask that you encourage outstanding agriculture and agri-food innovators to submit an application by the **deadline** of 5:00 p.m. on April 10, 2015. Should you require additional information please contact the Agricultural Information Contact Centre at 1-877-424-1300 or www.ag.info.omafra@ontario.ca.

I have also enclosed a copy of a brochure that highlights the recipients of the 2014 program for the Premier's Award for Agri-Food Innovation Excellence.

I look forward to learning about agri-food innovations in your municipality.

Sincerely,

Jeff Leal Minister of Agriculture, Food and Rural Affairs

DEPARTMENT: Clerk's Department

REPORT NO: C-039-15

COUNCIL MEETING DATE: March 09, 2015

SUBJECT: Clerk's Department Monthly Report

CLOSED SESSION

At this time we have nothing to report.

UPCOMING LEGISLATION

<u>Bill 31</u>, *Transportation Statute Amendment Act (Making Ontario's Roads Safer)* passed its second reading at the end of February, and was referred to the Standing Committee on General Government. Amongst other things, Bill 31 would provide municipalities with new tools to collect unpaid fines for *Provincial Offences Act* violations.

Ombudsman Report

On January 27, 2015, the Ombudsman for the Province of Ontario submitted the third annual report on investigations of closed municipal meetings. The Ombudsman serves as the investigator for municipalities that have not appointed a meeting investigator.

The Ontario Ombudsman's 2013-2014 annual report on municipal meeting investigations can be found online and a hard copy is available in the clerk's office for review. The annual report provides information about meeting investigations in 2013 to 2014, and includes themes observed through investigations and complaints, recommendations for best practices, and references to the *Public Sector and MPP Accountability and Transparency Act*, which has received Royal Assent, but has not yet been proclaimed.

Economic Development Department Report D-038 /15

TO: Mayor Comiskey and Members of Council

FROM: Kale Brown, Director of Economic Development

DATE: March 9, 2015

SUBJECT: Economic Development Monthly Staff Update

Department Activities:

Recent activities in the Economic Development Office have been focused on the following key initiatives:

- Tourism and Events Preparation is well underway for the events and promotion of the Town of Ingersoll this summer. In February we hosted the booth at the Men's Tankard but now attention will turn towards warmer weather events which we are sure are right around the corner.
- **2. Economic Development** February was an excellent month for the Town of Ingersoll and our future with the announcement of further large industrial investments.

General Motors has announced an additional \$560 million investment package for the CAMI Assembly plant. This investment will prepare the facility for the manufacturing of the next generation Chevrolet Equinox through \$190mn invested directly at the facility and \$370mn in supplier tooling investments.

With this latest investment, the total commitment from GM in Ingersoll in the last two years alone rises to \$810mn.

We would like to congratulate all the staff at GM CAMI for this clear recognition of their hard work over the last number of years.

3. Information Technology – Security Breach YTLC - IT Staff were informed by Fusion staff that there was a way to get around our desktop security in the YTLC. When exploited before the login this would give the user local admin privileges on the machine. To date, we believe there was little that could be done on the machines or the network but we will continue to monitor for any indications of compromises in the network

integrity associated with this breach. This exploit has been rectified on the YTLC machines.

- **5. Museum** In February, the Museum hosted 82 members of the Winter Beater car cruise which visited the museum as part of a larger tour and took advantage of the items on offer in the Museum gift shop.
 - Work is also underway on the preliminary design and location for a pavilion structure to be created from some of the beams of the Kirwin Barn. Once the design and location are

finalized, the museum will be bringing forward a report to Council to present the proposal and get a resolution to proceed with the project. This proposal is thought to be an asset not only to the Museum programming but also to the wider user groups who visit the Centennial Park area.

Looking forward, the museum is focused on a number of operational items including reorganizing, cataloguing and updating collection records during the period of renovation work in March. Operations are expected to begin ramping up for the summer season following the renovation work as the museum is already booking dates for a number of tour bus companies.

As a reminder, you can always keep informed of events by following the museum updates at www.facebook.com/touringersoll and our events calendar at www.ingersoll.ca for more details and information.

Sidewalk Plowing

• Considerable time was spent plowing and applying material to sidewalks in February. The cold temperatures, snowfall, melting and refreezing when the sun is present required the machines to be out to keep the sidewalks safe and passable. Contrary to public opinion it is necessary to be out on the sidewalks applying material and scraping regardless of whether it is snowing or not.

Equipment Repairs

 There have been a number of repairs necessary on the snow equipment due to the extreme cold and amount of use this February. Crews have done a great job maintaining their plows in between snow events.

Road Repairs

 There can be a 12 degree temperature increase on the roads when the sun is shining regardless of air temperature. Because of this temperature swing potholes are appearing as melted water seeps into the cracks and refreezes. Crews have been patching streets as necessary. I would encourage anyone who has seen a pot hole that has not been filled to call the Public Works Department or email and we will ensure it is filled.

Tree Trimming and Removal

 The annual tree trimming and removal contract has begun with Tabor Brothers Tree Service winning the tender. A final total of removals and trims will be available for next month's report.

ADMINISTRATION

- I would like to congratulate John VanLeeuwen a 9 year Town employee who was the successful candidate for the position of Lead Hand February 2nd.
- High school student Remy Weir started his high school co-op semester with the Department February 23rd and is fitting in well with the crew.

REPORT NO: OP-040-15

COUNCIL MEETING DATE: March 9, 2015

TITLE: Proposed Public Meeting on Train Whistling

OBJECTIVE

To provide an agenda for a possible public meeting on train whistling at grade crossings in Ingersoll.

BACKGROUND

As the result of Report OP-037-15 "Cessation of Train Whistling at Specific Railway Grade Crossings" at the Council Meeting of February 9, 2015, Council requested a report on a possible public meeting to deal with train whistling. This report provides a possible agenda for the public meeting.

ANALYSIS

The proposed agenda would be as follows:

Agenda

Welcome and Introductions

Jeff Willsie – Ontario Southland Railway – Jeff will speak about his operation and the requirements of the railway in regards to whistling

Sandra Lawson – Town of Ingersoll – Sandra will speak about the requirements of the municipality for the elimination of whistling at grade crossings and the time and costs associated with the process.

Sandra Lawson – Options available

Special Report No. OP-040-15 Regular Meeting of Council Date: March 9, 2015

Questions & Answer Period

In reviewing previous Council agenda's, Council did defer Clerk's Report C-113-05 "Elimination of Train Whistles" to a public meeting. A public meeting was held on November 14, 2005, where the Mayor and Council heard from the public that it was to everyone's benefit to continue with train whistles. That while train whistles are a nuisance and have a negative effect on the quality of life for the residents, it was necessary to weigh these impacts against the safety feature of the whistle and the number of lives that may be saved or have been saved by this unwanted noise pollution. As a result of the public meeting at the regular Council meeting of November 14, 2005, Council elected to take no further action on the elimination of train whistles in the Town of Ingersoll.

FINANCIAL IMPLICATIONS

There are no financial implications associated with this report.

An option that Council could consider to offset the costs of the safety audit and capital improvements needed to implement anti-whistling would be to implement a local improvement fee to any resident within a certain distance of the railway line.

RECOMMENDATION

That report Number OP-40-15 be received as information and further that staff be directed to set up a public meeting with the agenda as identified in this report.

TITLE: Ontario Community Infrastructure Fund (OCIF) - Application Based-

Catherine Street Project

OBJECTIVE

To obtain Council's approval to enter into an agreement with the Province of Ontario to receive grant funding for the Catherine Street Bridge and Road Reconstruction project and a partnership agreement with the County of Oxford as a partner in the project.

BACKGROUND

In September 2014, the Town submitted an Expression of Interest (EOI) to the Province of Ontario under the Ontario Community Infrastructure Fund (OCIF) for grant funding for the Catherine Street Bridge and Road Reconstruction Project. This project consisted of complete road reconstruction from Thames St North to Mutual Street with replacement of storm, sanitary and water infrastructure. It also included the replacement of the Catherine Street Bridge Culvert over the Henderson Creek.

On November 6, 2014, the Town was informed that it was successful in its EOI and had moved onto the next phase, the application process. The Town submitted its application for the grant funding on December 18, 2014.

On February 17, 2015 the Town was informed that it was successful in receiving grant funding for the Catherine Street project. The Town will receive the full requested funding for the project.

ANALYSIS

As part of the conditions for receiving this funding the Town must sign an agreement with the Province of Ontario. This agreement must be signed and sealed by the Town and received by the province no later than March 13, 2015. Also since this is a joint project with the County of Oxford, the Town is also required to enter into a partnership agreement with the County which must be executed no later than ten (10) business days after the signing of the Agreement. There are two by-laws before Council tonight,

Special Report No. OP-042-15 Regular Meeting of Council Date: March 9, 2015 one to enter into the agreement with the Province and one to enter into an agreement with the County.

FINANCIAL IMPLICATIONS

The Town has received grant funding from the OCIF for the Catherine Street Bridge and Road Reconstruction Project of \$995,253. The total project cost is \$1,727,499 of which \$110,584 is from the Town and \$621,662 is from the County of Oxford.

RECOMMENDATION

That report Number OP-42-15 be received as information.

TITLE: Naming of Streets in the Town of Ingersoll

OBJECTIVE

To seek Council approval for the process of naming of streets in new subdivisions.

BACKGROUND

For the last several subdivisions names for streets have been taken from a list of people killed in action during the war, as engraved on the cenotaph outside Town Centre (see attached list).

ANALYSIS

The Schout Group has approached Town staff in obtaining two street names for their Kirwin subdivision. Previously the developer has been given the list of proposed street names, that come from the people killed in action during the war, and select their street name from that list. If the developer didn't want to select a name from the list, then they approached Council for approval of the name.

Staff is recommending that we formalize this process of selecting street names as:

Developers can select street names from the approved list or if they wish to chose their own name, that name must be approved by Council.

FINANCIAL IMPLICATIONS

There are no financial implications with this report.

DEPARTMENT: Parks & Recreation Department

REPORT NO: R-039-15

COUNCIL MEETING DATE: March 9, 2015

TITLE: Parks & Recreation Program Guide

OBJECTIVE

To seek Council's direction on the future content and design of the Parks & Recreation Program Guide.

BACKGROUND

Prior to the spring of 2007 the Parks and Recreation Department produced and published its own Program Guide. The guide consisted of only Department programs and a one page community groups & services listing. The inside back cover was dedicated to the promotion of the Senior's Activity Centre.

In the spring of 2007 the Parks and Recreation Department stopped publishing its own program guide and became a major stakeholder in a private publication known as the "Here in Ingersoll" magazine.

The Here In Ingersoll magazine contained Parks and Recreation program information as well as community interest stories, non-profit community groups advertisements, private ad's, community contacts and special events.

In the fall of 2014 the Town became aware that the "Here in Ingersoll" magazine was no longer being published.

In order to advertize the Town's 2015 Winter Programs department staff created a publication "in house". Three quotes were obtained to have the program information printed and distributed to the community.

Special Report No. R-039-15 Regular Meeting of Council Date: March 9, 2015 At the time of preparing this report staff was working on the production of the 2015 Spring and Summer Program Guide to be distributed to the community the week of March 2nd, 2015.

Staff at VPCC and Fusion has the ability and skill to create *camera ready* pages to be taken to a private printer for publication.

ANALYSIS

The "Here in Ingersoll" magazine was a valuable asset to the community and has been missed by those who participated it its publication. Several non-profit community organizations utilized this publication to advertise their community programs and services.

The magazine featured several community "good news" stories in each edition that supported the promotion of community special events.

The magazine also provided a venue for private businesses to advertise their products and services in the community.

Staff is seeking direction from Council regarding the future publication of the Parks and Recreation Program Guide.

The following three options are presented for Council's consideration:

Option 1

The Town creates and publishes its own Parks & Recreation Program Guide three (3) times per year. The publication would only include Parks & Recreation information and a community groups and services listing.

Option 2

The Town create and publish a Program Guide that includes Parks & Recreation Program information, community groups and services listing as well as an additional 4 to 8 pages for non-profit community groups to advertise their programs and services (Pages must be in multiplies of 4). These additional pages could also be purchased by other municipal departments to advertise their services or special events i.e. Fire Department - Fire Prevention Week, Engineering Department - Spring Clean Up, Museum - Down on the Farm, Harvest Fest etc.

The non-profit community groups and municipal departments would be charged the full staffing cost for page layout and a percentage of the printing and distribution costs.

Special Report No. R-039-15 Regular Meeting of Council Date: March 9, 2015

Option 3

The Town *Call for Proposal* to see if there is a private publisher who would be interested in partnering with the Town to publish a similar magazine to the `Here in Ingersoll` with editorial, community group advertisements, private ad's and the promotion of community special events.

The Town would be a major stakeholder and guarantee a specific number of *camera* ready pages per publication, commit to a minimum of three publications per year and require specific distribution areas.

INTERDEPARTMENTAL IMPLICATIONS

None

FINANCIAL IMPLICATIONS

Option 1

The 2015 Winter Guide was completely produced *in house* by department staff. The guide was a total of 20 pages (including front and back covers). The cost to print 8,000 copies was \$4,072 plus taxes. The cost to mail the guide to every household, apartment and farm in Ingersoll, Beachville and Thamesford was \$1,462 plus taxes.

The total cost for printing and mailing was \$5,534 plus taxes.

As a cost savings in 2015 the Department is proposing that we reduce the number of publications to three per year – Winter, Spring/Summer and Fall. Preparing the guide *in house* is considerable less expensive than having a private publisher prepare the page layouts.

The proposed 2015 Advertising and Promotion budget for the entire Department is \$25,000. The 2014 Advertising and Promotion budget was approved at \$32,000.

Option 2

If the Town were to continue to publish the guide and offer 4 to 8 pages to non-profit community groups the Department would charge these groups advertising space. The advertising cost would include the full staffing cost to prepare the ad layout and a percentage of the printing and distribution costs.

Option 3

If a private publisher were to come forward with interest to publish a similar magazine as the Here in Ingersoll the Town would negotiate a price for *camera ready* pages as a major skateholder.

Special Report No. R-039-15 Regular Meeting of Council Date: March 9, 2015

RECOMMENDATION

THAT Council direct staff to proceed with option 3 and *Call for Proposal* to see if there is a private publisher who is interested in producing a community publication that is similar to the former Here in Ingersoll magazine.

Fusion Youth Centre's Entrepreneurship Program- SureStart

OBJECTIVE

The objective of this report is to seek council's support and permission to seek alternative funding sources for the continuation of the Entrepreneurship Training Program (SureStart) offered at the Fusion Youth Centre (Fusion) beyond September 2015. This would be on the premise that 100% of the program operation costs would be fully funded by outside funding sources.

BACKGROUND

Since 2008 Fusion has successfully operated the Entrepreneurship training program in Ingersoll and throughout Oxford County. The first 2 years was funded under the Youth Entrepreneurship Partnership Program with the Ministry of Economic Development and Trade (now the Ministry of Economic Development, Employment and Infrastructure) and most recently the past 4 years funded through the Ontario Trillium Foundation, which funding officially ends September 2015. Over the last 6 years Fusion has developed a comprehensive Entrepreneurship program which has benefited many local youth developing their Entrepreneurial skill set and assisting them in launching their business ideas. This program now called SureStart has been developed and delivered by Fusion and has operated out of the Youth Centre since inception in 2008. The average annual operating costs for the program have been \$125,000 (fully funded by outside sources). This cost includes employing 2 full time contract staff, with 5-8% of the program revenue going towards Fusion's General Program net expenditures for administrative support.

In 2011 the Town of Ingersoll signed a collaborative agreement with Community Employment Services (CES), who is a collaborative partner and referral agency to the program. CES has indicated that Fusion's SureStart program has a vital role to play in

Oxford County, filling the skills gap by delivering self-employment and entrepreneurship training for youth ages 14-29. The SureStart program has been successful in achieving its objectives over the past year. We are one of the only programs in Oxford County offering Entrepreneurship training for ages 14-29. Presently we're working closely with the Woodstock and Area Small Business Enterprise Centre, Ontario Works and the Oxford Small Business Support Centre.

The main outcome of the SureStart program is to Enhance Economic Opportunities for Youth in Ingersoll and Oxford County. The SureStart program objectives are to build a stronger and better skilled youth work force focused on the strengths of entrepreneurial skills, small business training, practical hands on experience and direct links to the business community, creating long term systematic change and transformation. Driven by today's knowledge based economy. We achieve this goal through providing network opportunities for businesses and youth, entrepreneurship conferences, workshop training, business development sessions, entrepreneurship exploration, one-on-one business supports and through assisting youth in launching their business idea.

ANALYSIS

Over the past 6 years SureStart at Fusion has grown, developed and taken on more formal integration throughout Oxford County and has truly become a key component to business development training in Ingersoll and Oxford County. It has easily become the prominent source of training for youth 14-29 in self-employment and entrepreneurship training in Oxford County. Many agencies rely on the SureStart program as we take referrals from over 5 local agencies. Highlighted below are the participant numbers for the SureStart Program for 2014.

After much evaluation and development the SureStart program is fully developed and implemented throughout Ingersoll and Oxford County. During our 4th year of OTF funding we have developed a more robust program that includes attraction strategies, a comprehensive service delivery model, partnership table, and benchmarking measures. This targeted approach allows us to quantify and demonstrate the value added impact to Ingersoll and Oxford County beyond the often reported qualitative stories. This change in evaluative measures positions SureStart well as a competitive candidate for future funding dollars. Unique to SureStart is the mobile training platform. No other business training initiative in the County adjusts the workshop location based on the geographic needs of the participants. In this manner SureStart is a leader in addressing the transportation barriers unique to rural areas. Without the opportunity for youth based, mobile, client centred approach to entrepreneurship development there is certain possibility that we will support the out-migration of our future business owners.

SureStart has had active representation on the Oxford Workforce Development Partnership, which Fusion is part of its strategic plan seeking to cultivate entrepreneurship. SureStart was identified as a leading opportunity for young people to engage in business support services and foster the retention of young talent in Oxford County. SureStart is listed on the Community Employment Website as being their leading partner in entrepreneurship training.

We believe that through the outcomes of the SureStart program we are contributing to overall local economy by building a better workforce in hopes that new business would be launched. Please refer to **Appendix A** for details on SureStart's program logic model.

We know there is a need in Ingersoll and Oxford County for Entrepreneurial and selfemployment training based on research done in the region. The following statistics has been pulled from Labour Development Strategies and Reports complete recently in the region.

- There are a total of 7,806 business in Oxford County 60% of which are "indeterminate" in nature suggesting no regular payroll. This typically suggests the self-employed or cottage industries within a community¹.
- Overall there was a decline of 71 businesses or 0.9% over the 5 year period to December 2009. The largest loss in business count occurred in agriculture and,

_

¹ Oxford County Labour Force Development Strategy Pg. 39-40 www.workforcedevelopment.ca/oxford-labour-force-strategy

- despite the fact that this industry is dominated by the self-employed, most of the business losses occurred in those businesses with employees².
- 1,509 people were surveyed who were either self-employed or considering self-employment options and were asked if they would consider attending workshops or seminars on business and/or entrepreneurship training. From those surveyed, 32%-38% were very interested, while 35%-44% were somewhat interested and 18%-33% not interested³.

We believe that the SureStart program over the years has demonstrated its impact and need here in Ingersoll and throughout Oxford County, and the importance SureStart has on our local economy. Although operating an entrepreneurship training program is not typical of a municipal youth centre running recreation programs, we believe that the overall impact this program has on the economics of the community justify working outside our traditional mandate at the Youth Centre.

INTERDEPARTMENTAL IMPLICATIONS

Fusion and the Town's Economic Development Department could play a role working together on program deliverables and outcomes specific to Ingersoll. This could be explored in further detail if Council approves the continuation of the SureStart program.

FINANCIAL IMPLICATIONS

There would be no cost to the Town of Ingersoll to continue to operate the SureStart program beyond September 2015, as the expectation would be to secure 100% funding from outside sources for all associated program costs. Based on the funding we apply for, we can typically request (within reason) that 10-12% of the revenue go back to Fusion's General Operations for administrative support. All funding applications and/or funding opportunities would be reported back to Council for approval prior to securing any additional funding to continue the program. New costs to operate the SureStart program after September 2015 would roughly be \$85,000 annually based on employing one full time contact staff and all related program costs. If funding is not secured for the continuation of SureStart by September 2015 the program will be suspended until such time funding is available.

Currently we have a letter of intent submitted to the Ministry of Economic Development, Employment, and Infrastructure which simply states our interest in applying for funds. We are also currently in conversations with the Woodstock and Area Small Business Enterprise Centre (WASBEC) in assisting the delivery of the Starter Company program funded through the Ministry, which would include roughly \$35,000 in funding annually. Should council choose to proceed with the continuation of SureStart and we are invited to write a full application for funding, or develop a Memorandum of Understanding with WASBEC, we will bring back a staff report to council seeking approval to move forward with any type of funding or application.

Recognizing that the funding landscape for potential youth program funding over the next few years is heavily weighted towards Youth Entrepreneurship training we believe it is in the best interest of Fusion and the youth in Oxford County to continue with the program.

RECOMMENDATION

THAT Council approve the continuation of the SureStart program at the Fusion Youth Centre, with 100% of program related costs coming from outside sources.

AND FURTHER THAT Staff will report back to Council all funding applications and/or funding opportunities for approval prior to securing any additional funding to continue the program.

DEPARTMENT: Treasury

REPORT NO: T-040-15

COUNCIL MEETING DATE: March 9, 2015

TITLE: Development Charge Indexing

OBJECTIVE

To adjust the Town's Development Charges for inflation as prescribed in the Development Charges By-law.

BACKGROUND

The Development Charges By-law #14-4760 section 15 states that the development charges may be adjusted annually on April 1st of each year in accordance with the most recent twelve month change in the Statistics Canada Quarterly "Construction Price Statistics". The index is a measure of the building construction price increases and by applying the index to development charges is a means to ensure the funds collected reflect the cost to construct future capital assets.

ANALYSIS

The 2014 4th quarter annual index in the Construction Price Statistics has increased 1.9%. The following are the Town's current and the proposed rates with the indexing applied.

	Singles	Rows & Other	Apartments		
	& Semis	Multiples	Large	Small	
Current Charge	\$3,422	\$2,532	\$1,842	\$1,381	
Proposed	\$3,487	\$2,580	\$1,877	\$1,407	

INTERDEPARTMENTAL IMPLICATIONS

None

FINANCIAL IMPLICATIONS

The rate increase is an inflationary adjustment to support the needs as identified in the Development Charge Study. It is not new money to fund any additional needs.

RECOMMENDATION

That the Council for the Town of Ingersoll approved the Development Charge indexing of 1.9% effective April 1, 2015 in accordance with the Development Charges By-law #14-4760.
